Which aspects of the course were most helpful? Why?

Comments
The course isn't too difficult and materials are clear
Review classes and powerpoints.
It was informative and gave me a good background of statistics
I liked the guided note packet for this course. It made it easier to follow along during the lecture and would make me stay focused.
The PowerPoints covered the chapter material well.
I enjoy statistics and this taught how to calculate statistics without using a calculator. It was very interesting to learn.
I liked the supplementary course packet and it helped with taking notes in class.
The recitation and lectures were awesome. Very clear and informative.

Which aspects of the course would you change? How and Why?

Comments
The course packet you get from Johnny Print is not in order of the lecture slides.
The note packet definitely needed work, it was out of order with the slides at times and had some variations from the slides that made it difficult to understand at times.
N/A
The printed course booklet had a lot of mistakes, and there were multiple times where the booklet did not match up with the PowerPoint and became hard to follow. Also during lecture sometimes the material would be exceedingly repetitive, such as the Excel examples. Those examples could easily be covered in lab, and the lecture could focus on the rest of the chapter material that was on the exams.
This class was great up until midterms. This is no fault of anyone. All classes went online and I struggled with doing well after having to attend classes online. no fault of anyone.
None
The online homework was a big waste in my opinion. It is very expensive and I don't think the homework was very helpful when preparing for exams.

Which aspects of the instructor Monika Islam Khan were most helpful? Why?

Comments
The eco391 email takes days for response, and the instructor is hard to approach. He responds to emails without care, which came across as rude.
Very relateable and respectful of students.
She was willing to help
Dr. Dellachiesa always wanted his students to understand the material. I liked how Dr. Dellachiesa would have an exam review before our exam and would walk us through all of the practice exam problems. He would also answer any questions we would have during class. Dr. Dellachiesa is a very good professor.
She was very prepared and wrote out the steps to the problems we solved together in class.
He explained things very clearly and I learned a great deal in the first half of the semester.
Ms. Khan was very knowledgable and helpful with answering questions.
His lectures were awesome! He is a great professor! He made statistics easy to understand and showed us how to use it in the real world. I have enjoyed his class very much and I would take another class with him.

Nothing.
I felt like I learned very little after classes went online. I don't think this is the fault of the professor because I need to be present and see what he writes down to fully understand the concept, especially since it is a math based class. This is just circumstances and in no way reflects his teaching. He was a great professor.
